A Cross-Chain Ecosystem Unlike Any Other..

- AXON is a “Do-To-Earn” ecosystem with its own blockchain, which is not limited to specific actions and activities.
- You are given the opportunity to choose from a wide variety of projects and endeavours, tailored to your specific lifestyle and needs.
- Enjoy rewards and get paid while exercising, traveling, listening to your music and much more!

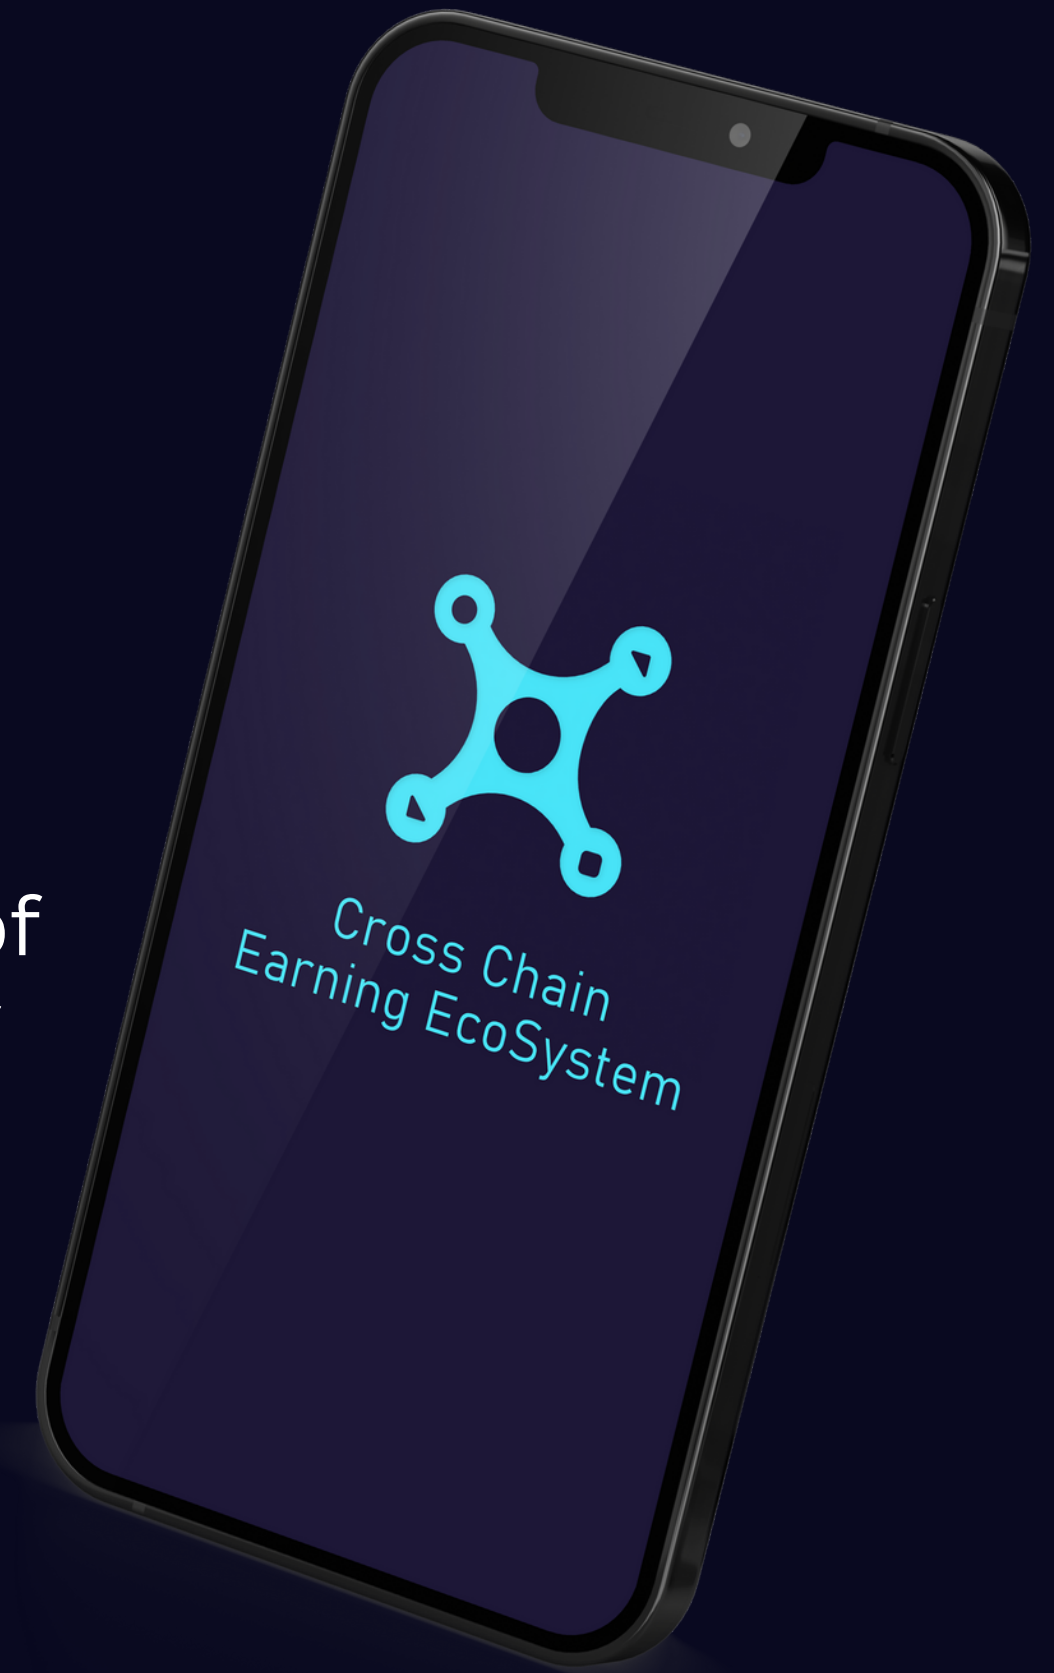

Vision:

- The vision is simple and straightforward:
 - To uplift the standard of living for our investors and help them generate consistent revenue for doing what they love doing the most.
 - With various means to sustain the ecosystem, it aims to be the go to place for people to go live their lives to the fullest.

Mission:

- We intend to broaden and disseminate our ecosystem as a physical and mental health statement and vision, with the end goal of enabling as many individuals as we can to examine facts regarding their health, while we keep the entertainment factor high at the same time.
- In addition, the AXON team plans to leverage every aspect of social media for dissemination, aiding in the construction of a vast environment that is capable of sustaining itself.
- We are going to link the real-world user profiles with the identities of the users in the virtual world, aiding individuals to keep moving forward with their efforts to make more positive behavioral improvements in the present day.

The EcoSystem

- The AXON ecosystem is not limited to specific activities (e.g. walk to earn), but has a wide variety of apps from which the users can choose, depending on their corresponding interests and goals.
 - The AXON ecosystem is composed of multiple Do-To-Earn activities, giving its users the ability to choose the ones that are appropriate for their lifestyle and needs.
 - Different tokens are used for each application, but like the ecosystem, all of them are governed by \$AXC.
-

The EcoSystem

Starting with the Move-To-Earn model, we will build up Travel-To-Earn along with multiple other Do-To-Earn activities. We believe that the link that will be formed between users and the community as a result of activities will encourage the growth of an ecosystem that is both robust and sustainable. In the end, you will reap the advantages, both literally and figuratively, of good health and financial prosperity.

A step into the future - Axon Chains Blockchain

- We are currently developing the Axon Blockchain, one which will be a home to all our do-to-earn apps.
- The blockchain will be open exclusively for developers who want to launch their own do-to-earn apps and projects.
- A detailed whitepaper will be out soon - stay tuned!

AXON Blockchain

- \$AXC holders Govern the ecosystem
- Make decisions on current projects
 - Functionalities
 - Expansion
 - Enhancements
- New projects
 - Propose ideas and choose new projects to be implemented
 - Fund new projects
- Utility tokens for each new project

**Presenting the
first product by
Axon Chains**

Powered by
Axon Chains

Walkie

- AXON's Move-To-Earn stylish and easy to use app, which intends to alter the global Healthy Lifestyle trend by providing more value to personal exercise and movement.
- To be released on Android & iOS, our objective is to establish a community where individuals may interact via health and sports.
- We are a team of dedicated individuals committed to developing innovative lifestyle-enhancing solutions.

Walkie

- Our Move-To-Earn app is based on an essential everyday activity for the majority of people: movement and exercise.
- Users gear up with Sneakers that contain NFTs.
- The application is open to all users and participants. Users are not required to comprehend NFT or be familiar with the Crypto space in order to begin.
- Start moving is all that is required to begin utilizing AXON's Move-To-Earn capabilities.
- You can either embark on this adventure alone in the "Solo" mode, or along with your friends and family in the "Multiplayer" mode.

Sneaker Model - Each sneaker will provide you a different quantity of \$WALKIE.

Sneaker Performance and Attributes - The greater the performance, the greater the \$WALKIE/min that may be attained.

Sneaker & Moving Speed - To maximize their benefits, users should move at the optimal speed for their shoes.

- To begin your Move to Earn, you must acquire an NFT Sneaker and possess Stamina to obtain a Walkie Access Token (\$WALKIE). Every 1 Stamina is comparable to five minutes of movement, but only after the purchase of sneakers.
- Be mindful of your Stamina before engaging in any physical activity, as you cannot earn any tokens without it. There are four primary components of \$WALKIE/\$AXC

Multiplayer

- After accumulating a specific number of points, users have the authority to organize their own clubs and group challenges.
- Leaders are also capable of pitting their teams against one another.
- The rankings are determined based on the number of competitors and the total kilometers achieved within a certain time period.
- In addition to \$WALKIE/\$AXC tokens, the victorious team can obtain a rare NFT Sneaker.

Presenting, the
Second product by
Axon Chains

MAKE IT EASIER FOR EVERYONE TO EXPERIENCE THE
WORLD.

Weaver Travel

A smarter way to travel around the
world

General Idea

A travelling platform that enables users to be rewarded for completing travel challenges, contributing new challenges or travel locations, spots and activities and for evaluating the deployed challenges and content.

Made for travellers, adventurers, explores and family.

Motivation

Existing travel platforms provide the users with details about accommodations, best prices and extend as far as enabling them to provide feedback on visited locations and travel spots. The following issues have been identified..

Users are required to search and index these platforms for different locations to visit and evaluate them based on distance, pricing and whatever feedback has been provided by previous visitors.

The incentivization mechanisms for user interaction and feedback is mostly provided through the form of loyalty discounts and gifts.

While users learn the necessary data about the location they want to visit, their interaction with that data is mainly used for informative and geolocation purposes.

Decentralized Innovation

The integration of Blockchain into these travel platforms can facilitate a decentralized playground for users to interact with travel challenges created by their knowledge about travel locations, spots and activities and gain rewards in the form of cryptocurrencies or destination rewards. This playground can provide a way for new and advanced decentralized business models by gamifying the travel experience of the user and his interaction with the platform

TRAVEL CHALLENGES

Different Challenges in Different locations.

TBA..

CRYPTO REWARDS SYSTEM

Users will be rewarded with the utility token, later on they can be rewarded with governance token \$AXC after reaching specific level.

Rewards will be sustainable which creates more excitement and joy for the user.

TRAVEL KNOWLEDGE

Weaver travel research platform aggregates reviews and opinions of members about destinations, accommodations (including hotels, B&Bs, specialty lodging and vacation rentals), restaurants and activities throughout the world through its flagship Tripadvisor brand

Extra Platform Services

Flight Tickets

A metasearch engine and travel agency. The company lets people research and book travel options for their trips, including flights.

Hotel Booking

By investing in technology that takes the friction out of travel, Weaver seamlessly connects millions of travelers to memorable experiences, a variety of transportation options, and incredible places to stay – from homes to hotels, and much more

Visa Processing

The main difference between a visa and a passport is that a visa is an endorsement placed within a passport that grants the holder official permission to enter, leave or stay in a country for a specified time period. The most common visa types are tourist, student, work and transit visas. With us we will help to identify your needs on how to get a visa to specific country destination you travelling to.

Earning Concept

- Landmark challenges where users will need to pass through a specific geographical trail and complete a set of activities defined in these challenges to earn crypto tokens. Base challenge activity will be user feedback which will be evaluated and provided back to the users as a way of rating the landmark.
- {“Must visit”, “Should visit”, “Could visit”, “Wouldn’t visit”}
- Event challenges where users will be invited to participate in several challenges based on a specific geolocation which must be completed in a specific time period. These could also be done in groups (!).
 - Redeem coupons for rewards other than crypto (shop vouchers) or in form of fiat money.
 - Evaluating existing challenges with feedback will provide extra rewards to the user, as they aid in the challenge evaluation process.
 - Registering new Landmark or Event Challenge can be rewarded as a way of incentivizing user to add more content and expand the ecosystem.
 - Flight ticket lotteries for using a specific airline to travel and start doing landmark challenges on geographical location.

Why Weaver?

Improves connection among employees

Having more channels to communicate fosters communication and collaboration - enabling employees to work more efficiently.

Raises productivity

Having the right systems and tools in place helps increase employees' productivity, boosting their performance and allowing them to have a sense of accomplishment.

Encourages learning and development

Technology provides employees with access to resources and the means to learn and evolve.

Weaver brings back the joy and excitement in travelling.

Governance

- The heart of AXON's ecosystem is its users and thus, the power to decide which projects and activities will come into fruition passes to them.
- Depending on the \$AXC holdings of each user, their voting power will have the corresponding gravity.
- More specifically, \$AXC holders will have the ability to vote on matters of:

Upcoming projects

- Challenges/Quests/Activities to be created in the AXON's ecosystem apps
- Equipment and NFT designs
- More is coming soon!

Progressive Roadmap (1/2)

Q4 - 2022

- Website Launch
- Private Sale
- Security Audit
- Presale
- Beta Test
- Dex Listing
- Cex Listing

Q1 - 2023

- Buy \$AXC with Credit Card
- Staking
- Prepare Move-to-Earn app
- NFT Shoe Sale
- Launch

Q2 - 2023

- Activity through hardware integration
- Athletics Partnership Revealed
- Travel to Earn Application
- Community & competition events
- CEX Listing
- Prepare Mining Farm

Progressive Roadmap (2/2)

Q3 - 2023

- Bridge to other Blockchains
- More Do-to-earn Apps
- More App specific Token and NFTs
- Push more Strategic Marketing

Q4 - 2023

- Develop more interoperable apps
- Charity Events
- Axon Chains Blockchain test-net
- Marketing
- CEX Listings
- Axon Chains Blockchain

Tokenomics

Total Supply: 250 Million

BUY 10% SELL

Taxes Will be Reduced when we get in Top Tier exchanges

Token Price \$AXS :

- Initial price: 0.0045
- Presale price: 0.0040
- Private price: 0.0035

Market cap Estimation :

- * TGE Mcap : 647,325\$
- * Fully diluted Marketcap : 1,145,506\$

Total Supply: 250 Million

Token Allocations:

- a. **Private sale:** 31,200,000 Token
- b. **Presale:** 122,400,000 Token
- c. **Utility Future Developments :**
19,700,000 Million Locked
- d. **Support Utility Projects** (in form of Rewards): 20 Million Locked
- e. **CEX Listings:** 20 Million Locked
- f. **Staking:** 25Million (*will incorporate stable APY for a long term sustainability*)
- g. **Influencers | Partners:** 11,700,000 Tokens

Tax Breakdown

1% LP

Strong liquidity pool is required to mitigate sell pressure but also welcomes in big players to invest if the LP pool stays strong.

1% Phoenix

Used as a treasury for buy backs or emergency funds for the charts.

4% Utility Development

We will develop and deploy a variety of high quality projects in our ecosystem (particularly in the “Do-To-Earn” sector), which will require funding

4% Marketing

Marketing will be required to push the multiple projects in development of our Ecosystem. We will use traditional & non traditional crypto marketing strategies.

Revenue Generation Model

AxonChains Sustainability

- **Token sustainability is a crucial implementation that will be integrated and maintained**
- **Ad Revenue:** All utility apps developed within the ecosystem will be integrated with ads. This will allow non-crypto users to use the apps & all ad revenue will be pumped back into the token.
- **Real Time Events:** We will host RTE where users will have to subscribe in order to participate to events.
- **Sponsors/Partnerships:** We will engage in building connections with sponsors to help diversify the AxonChains to different networks.
- **Taxes from Services:** Once our utilities have been deployed, they will be injecting LP into the core LP of \$AXC aswell as buybacks.
- **Mining Crypto Rewards:** Another form of revenue to help sustain the token will be by setting up mining farms. The revenue generated by the farms will be put back into the tokens LP and used for further growth plans
